

C6: Blended Mobility of Higher Education Students related to the course on Smart, Sustainable and Resilient Urban Mobility

Scheduled for October 30 to November 3, 2023 and planned to be held in the premises of the Czech Technical University in Prague.

This learning, teaching and training activity (LTTA) will be the Mobility Week related to the course on Smart, Sustainable and Resilient Urban mobility (IO6) that will be developed and delivered by assigned lecturers of the Czech Technical University in Prague.

The course is composed of five modules as described in the section about IO6.

Module 1: Transport and Environment

Module 2: Transportation and Land Use Planning

Module 3: Traffic surveys

Module 4: Smart mobility

Module 5: Smart, Sustainable and Resilient Logistics

The assigned lecturers on behalf of CTU will participate in the Mobility Week with the provision of additional seminars and case studies. Together the invited lecturers will create an environment that encourages collaboration in teamwork among students in their respective subjects and will provide guidance on group dynamics and communication and will offer feedback on the process and outcome of the team's work.

Some technical visits are expected to be organized in the programme of the Mobility Week.

Only students who will have attended online lectures and will have accomplished all online assignments will be entitled to apply for the participation in the Mobility Week which will be an optional component of the course.

A detailed programme of the Mobility Week will be provided later on by the end of June 2023 and will be published in the website of RESICITIES project together with all detailed programme of the referred course and instructions for free registration.
